### TOP STORIES

- FBI and EC save the day during hostage situation!
- E-11's frustrated with the lack of L-88!
- Site Inspector disappointed in the site.
- Class-D says they love to riot! SSF is ready to handle it.
- DRI raises concerns over frequent hostage situations.
- Has the Foundation not paid the light bill? ASC comments on the power outages.

### ANNOUNCEMENTS

- Faction Management apps are OPEN! Apply today!
- HUME Levels rising in the Research Complex?! Be careful!

### JOKE OF THE DAY

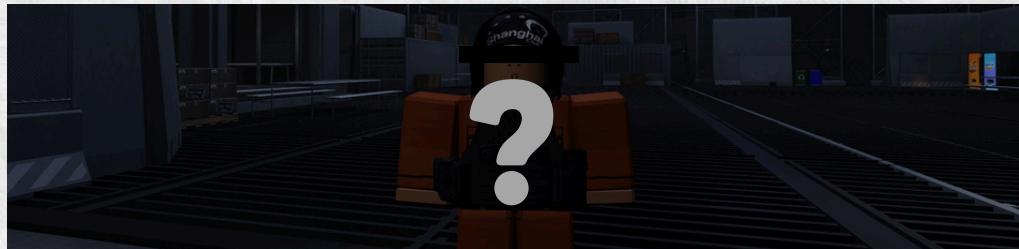

"How fast can SCP-173 move?  
Breakneck speed."

Submit your anomalous jokes today!

## MYSTERY GANG TAKES DRI MANAGER HOSTAGE!!!

An Ethics Committee member reveals that a mystery gang had taken a Develon Research Institute Manager hostage earlier that day. EC commented that with the teamwork and efforts of the FBI and EC, the hostage was rescued safely and confirmed no other casualties.

EC denied any further comments on the "Mystery Gang". Who are they? What do they want? More info to come!

## WHERE IS BULWARK? TAU-1 STEPS IN

E-11's that guard the checkpoint to the Middle Containment Zone have voiced their frustrations in regards to the lack of L-88 and the amount of by-passers.

The E-11's sang high praise towards TAU-1, commanding the faction for stepping in and helping with RK and Detain when most needed.

L-88 has denied any comments.

## SITE INSPECTOR SAYS SITE IS "SHOCKING"

Drama and disappointment unfolds as the Site Inspector was instantly rushed into the breach shelter during an SCP-049 breach.

When asked for a comment the Site Inspector said "Shocking" and "Off to a terrible start".

Not a great look for Site-416 today.

#### SSF CONFIDENT IN HANDLING CD RIOTS! CD SAYS OTHERWISE

Class-D riots have been on the rise! Civil Foundation personnel have been worried. Is CDC security not living upto expectations? Read what SSF have to say below!

*SSF: "I don't understand why CD's riot. They have nothing to gain. Only to lose. They'd have a higher chance of surviving if they just listened. Their attempts to escape will never get past us. They think they can mess with the top military force."*

When Class-D's were asked for a comment, they were more than happy to share their thoughts.

*CD: "I believe that the guards lack combative abilities. I heard from someone else that all guards here got slimed by a single CD. Riots are totally reasonable. Since Ambrose Restaurants is off-site, we lack decent food."*

Positive feedback on Ambrose Restaurants! Will we get to see them more?

#### ASC COMMENTS ON POWER OUTAGES

Power outages continue weekly on-site. Questions were raised about what really happens to the Core Reactor during these moments. Is something wrong, or is it just routine?

*ASC: "The reactor continues to generate power steadily as usual. ASC personnel are carefully recording and reviewing all data and information. There's nothing to be afraid of. Generally, these interruptions aren't something to fear, so yes, it's a standard routine."*

#### SECURITY ALERT

- Frequent SCP-049 breach. A reminder for MTF to use their lavender sprays!
- Report any suspicious activities to FBI, IA and ISD.
- E-9's have no more autopass in MCZ unless it is an emergency.

#### IS IT ART? OR AN EYESORE? MCA CREATES WORK OF ART IN SECTOR THREE!

Maintenance Crew on site took the initiative to create a barrier art piece in the middle of Sector Three. The same spot where the Site-416 Christmas tree in 2025 once occupied.

#### ETTRA TRACKS DOWN 035

An SCP-035 breach alert was issued site-wide, and the disappearance of The Mask caused panic within Sector Three. ETTRA stepped up to the job and organised a search before finding The Mask as a B-7 hiding within BIO.

ETTRA was commended for their swift actions in locking down BIO and terminating the anomaly.

When asked to comment on how it went, they replied confidently with "*It was pretty easy.*"

#### DRI CONCERN OVER A RISE IN ROGUE CLASS-D'S TAKING HOSTAGES!

During a sit-down with a DRI Researcher, concerns were raised about the high rise in hostage takings within the Research Complex that seems to have a large impact on the department. *"Most people get held hostage here on the weekly. It is concerning. Some can't leave without an escort, some are traumatised from the situations."* More patrols from SD and SSF were suggested to improve the security conditions within the complex.

On a lighter note, even with the regular encounters with rogue Class-D's, DRI have been hard at work the past week. *"Our team is a perfect mix for now. We have a good half dealing with containment/recontainment studies and some that do work with figuring out more about the anomaly itself"*. Helping humanity one test at a time!

DRI departed with final words, issuing a warning to those on site to NOT enter the SCP-12955 containment cell. No further comment was added. It makes you wonder what secrets are in that cell?
